Technical Information Polyester Fine Filler "styrene-free"

Highly elastic, 2-component polyester fine filler to fill small unevennesses and for the "fine-filling" of pre-treated surfaces. Applicable on metal, wood, concrete and on repair spots which are filled with presto Body Filler. Micro-fine filling components result in a very smooth surface.

For universal use on many materials in the entire car, construction, and hobby sector.

For preparation and finishing your filling job, we recommend our presto sand papers. We offer a wide assortment of fine and coarse papers for dry and wet sanding.
