Technical Information prestolith pro Soft Light Filler

Professional Putty - now in new, styrene-reduced quality.

To level out unevennesses and for thin "fine filling" of pre-treated surfaces.

prestolith pro Softfine Filler is a highly elastic, quick curing 2-component polyester fine filler, as mixture of a highly reactive, unsaturated polyester resin, filled with a combination of innovative pigments and extenders.

Fields of application:

Car sector, machine construction.
Applicable on metal wood, concrete or on surfaces which are already pre-filled with presto filling compound.

For preparation and finishing your filling job, we recommend our presto sand papers. We offer a wide assortment of fine and coarse papers for dry and wet sanding.
