Technical Information PTFE dry

Dry, surface lubricant to treat mechanical parts of metal and plastic, where no residues of oil or grease are desired. PTFE dry leaves no residues of oil or grease (dry film) and prevents wear and sticking. PTFE dry has a very low friction factor and an excellent adhesion and is resistant to weather influences. PTFE dry is suitable for parts which are liable to light load and low speed. MoTip PTFE Dry can also be used as release agent for moulds, where the use of silicones is not desired.
